

SPECIFICATIONS AND REQUIREMENTS

BE-110 SPECIFICATIONS: (Specs for the BE-104 are on page 5)

Read and follow instructions carefully before installing your BREW EXPRESS in-the-wall COFFEE SYSTEM. For best results, it is advised that you hire a qualified professional.

- 1. Overall Dimensions** (Finished Unit with Rough-in-Box) approximately 12 1/4" X 13 3/8" (see below).
- 2. Dimensions for Rough-in-Box** (Mounting Structure) approximately 11.5" X 11.5".
- 3. Electrical Requirements** 120VAC, 60HZ. (1400 watts).
- 4. Water Requirements** 1/4" OD water supply line (copper or poly) minimum 30 psi to a maximum of 90 psi. Potable COLD water is required.

NOTE: If water is not available, an alternate water dispenser jug (5 gallons) can be used with the optional pump accessory (not supplied). Contact Lance Larkin for more information.

Please Note: A filter and shut off valve at water source is recommended. The filter, such as an ice maker type filter, can easily be installed at the source. If water lines are not purged or clear of debris or a filter is NOT installed, foreign particles (debris) in water may clog brewer system causing failure, and will void all warranties.
